

ScumbackTM **H75**

The classic British guitar tone from the 60's through the 70's.

Tight bass, low mids & clear treble response guitar speaker with detailed overdrive and distortion tones. Huge fat sound right out of the box due to factory aging, design and break-in procedures. This is a superb tone recreation of the G12H30 Pre Rola 75hz "Greenback" 003 lead cone that was used in Marshall stacks and combos, and many other British amps of the era such as Vox, Orange, Sound City, etc.

Specially treated 75hz cone sounds 20 years old.

Pre Rola style doping just like the originals.

50 oz magnet, 1.75" voice coil, 12" wide.

8 bolt pattern allows mounting to most amps.

Available in 30, 65 and 100 watt HP power handling. Also available with 55hz & 65 hz bass response.

12-1/8" (30.79cm) diameter, 5-3/8" (13.67cm) deep, 8.5 lb (3.85Kg) .
