

Scumback™ M75-LHDC

The classic British guitar tone from the 60's through the 70's.

A hybrid design for new tones. Take an M75 but use the G12-65 style cone with a large dust cap and you get the Scumback M75-LHDC. More bass than the M75, with a silkier high end response, not quite as sharp as the M75 by itself. The silkier high end is great for the D-tone amps, open back Blackface combos and for single coil guitars who want more bass. Think of an aged Pre Rola type G12-65, that's the M75-LHDC.

Specially treated 75hz cone sounds 20 years old.

35 oz magnet, 1.75" voice coil, 12" wide.

Available in 30, 65 and 100 watt HP power handling.

Pre Rola style doping just like the originals.

8 bolt pattern allows mounting to most amps.

This speaker is like an aged G12-65 tone.

12-1/8" (30.79cm) diameter, 5-1/8" (13.01cm) deep, 8.5 lb (3.63Kg) .
